Dynamic Synergies Group Announces Move to New Corporate Offices

Newtown PA, June 15, 2009: Dynamic Synergies Group, Inc. (“DynSyn”), a premier Business, Management, and Technology Services firm is moving its Corporate Offices to Newtown PA. The Company has entered into an agreement with REGUS Plc. for facilities in the Silver Lake Executive Campus in Newtown PA.

“Nearly three years ago, our team embarked on a quest to expand DynSyn’s business by offering significant outsourcing and management services. That investment has paid off in terms of an upsurge in expansion, requiring us to acquire commercial office space,” explained Don George, company founder. DynSyn’s new Corporate Office facilities will be at 41 University Dr – Ste 400, Newtown PA 18940. All phone numbers remain the same. The move will commence in June and be completed during the summer. An official “grand opening” is planned for September.

The Company’s other principals include Jim Boyle, responsible for Client Services & Operations and Rich Felte, responsible for Project and Implementation Services. DynSyn has developed a thriving “virtual services” Company providing consulting and outsourcing services across many industries and utilizing people and resources throughout the world to deliver those services.

“We expect to see monumental growth in our Company over the next 18 – 24 months,” commented George. “We have developed a strategic plan that is now coming to fruition. The benefit of starting with a blank piece of paper two and a half years ago is that we were unencumbered by tradition, infrastructure, and misguided beliefs. Unlike other companies, we’re not buried in low-value, high cost paradigms that prevent revolutionary changes in business models. Our principals are our leadership team and have the knowledge, experience and vision to bring about significant change.”

The Company’s principals are area residents with George residing in Upper Holland PA, Boyle in Warminster PA, and Felte in Hatboro PA. They’ve worked throughout the world, providing business and management services as well as outsourcing of information systems and delivery of project management solutions.
